ALLOY CENTERING RINGS - SET OF 4

Wheel Hub Centric Rings are designed to fill in the gap between the hub of the car and the center bore of the wheel. Most wheel manufacturers design their wheels with a centerbore large enough to fit on most cars. Therefore, most wheel fitments have a gap between the hub and the centerbore. This gap usually doesn't allow for the wheel to fit hubcentric but rather lugcentric which causes vibration. Therefore, to fill the gap and ensure the fitment is hubcentric, hub rings are used.

Customer lost their Spline & Tuner Key?
 This set was designed for the purpose of removing most types of tuner lug nuts on aftermarket wheels. Every manufacturer of tuner nuts uses different sized keys. You would be hard pressed to find a tuner nut you can't remove with this set. The kit includes 15 different types of keys housed in a durable molded plastic case, with locking clips for easy organization and hassle-free storage. With Ceco's Master Tuner Key Kit, you can remove just about any aftermarket wheel that comes your way. Sell your customer a key from the kit and simply re-order and replace to make your kit full again!

ATEQ PROGRAMMING TOOL

VT46-RTX

The ATEQ VT46 is an affordable, TPMS programming tool packed with essential features and functions. Designed with mid-sized tire shops in mind, its color interface guides the user when replacing and servicing TPMS sensors. With the addition of the optional OBD2 module, users can reset the ECU in less than 2 minutes. The ATEQ VT46 supports all known programmable TPMS sensors and is frequently updated with new features and up-to-date vehicle and sensor coverage.

- Easy to operate with ATEQ's icon interface and bright color display
- Activates and reads TPMS sensors of all light vehicle brands globally
- Programs all leading universal aftermarket sensors
- Displays all sensor data in seconds: ID, tire pressure, tire temperature, battery status, etc.
- Provides indirect, manual and auto relearn procedure information
- Selects vehicles via make, model, year look-up
- Provides TPMS sensor part numbers
- Checks Remote Keyless Entry signal
- Frequent database updates via PC desktop software
- Interface and relearn procedures in 23 languages
- The optional OBD2 module gives access to OBD relearns for 60% of all car models worldwide
